In *The Stone*, author David P. Welden presents evidence to prove the existence of ancient astronauts, known as the Anunnaki, who created *Homo sapiens*. The book details how the modern species of humans was formed via genetic manipulations between *Homo erectus* and the Anunnaki. The author reveals firsthand accounts of people who have been aboard alien ships. He also provides a detailed timeline of the chronology of Earth from 450,000 B.C. to 2023 B.C. Welden goes on to explain the genetics behind it all, including a discussion of mitochondrial DNA and the role of the Y chromosome. At the end of the book, Welden offers his own conclusions based on years of study and empirical evidence.
