

Coders Dictionary - 2006

Introducing the new Coders Dictionary, the only dictionary created for coders by coders. Unlike other medical dictionaries, the Coders Dictionary provides clear and concise definitions of terms from a coding perspective, enabling coders to better select the most appropriate code when reviewing a medical record or an operative report. Its the only book of its kind, specific to the needs of medical coders, admitting clerks, billers and adjudicators, designed to help expand terminology understanding and improve efficiency when billing.
