

God: the Intelligent Designer

Intelligent design: certain features of the universe and living things are best explained by an intelligent cause- a science of design detection. An ongoing debate in society on the origin of the universe and all that it contains puts scientists, religionists, educators and others at odds with each other. What is the true age of the earth? Did the universe come by intelligent design, creation, or evolution? The inability for scientists to reconcile religion and science has led to confusion, changes, and correction as new information and discoveries are found, both subject to human wisdom and interpretation. Dr. Rollins believes that there is too much order and beauty to have happened by chance. Truth from any source is logical and self-consistent. Written for general audiences, Dr. Rollins writes an excellent reference to help resolve conflicting views between religion and science. Some topics that he discusses in the book are: *True science and true religion are in agreement. *Science suggests a universe of intelligent design. *The Bible accurately represents the truth about the creation and the age of the earth. *Science tells us the earth is 4.5 billion years old. Creationists say it is 6000 years old. Scriptures reveal it was formed from old, unorganized material starting 13,000 years ago.
