

# epreneur: From Wall Street to Wiki: Succeeding as a Crowdpreneur in the New Virtual Marketplace

The new virtual marketplace has arrived. Opportunities abound, and billions of dollars are springing into existence, from YouTube and MySpace to Facebook and Google. This is the age of e-Preneurs--those individuals who combine entrepreneurial skills with Web 2.0 savvy. Web 1.0 was an information highway, but Web 2.0 is all about social networking, community building, global interactivity and mass collaboration. And, after learning from the fateful dot.com bust, Wall Street is on the bandwagon--again. So what's the next big thing? The crowd-based creative fire that Wikipedia sparked has caught on beyond anyone's projections, and its effect is increasing daily. The term wiki--a collaborative Website that can be edited by users--is increasingly part of modern vocabulary; the online crowd is becoming unstoppable. Tapping into this vast resource of wisdom and power goes under various names, such as crowd clout, crowd-sourcing, and crowd power. Today, the power of the crowd is used for everything from swapping photos, designing shoes, discovering pharmaceuticals, and developing software. In coming years, however, this global mass of humanity huddled around computers will shape policies, assist companies, and even affect countries as never before. That's where crowdpreneurs come in. People who utilize crowd power for the pursuit of innovation in the new virtual marketplace, crowdpreneurs are the entrepreneurial leaders of the online age. e-Preneur is the first book to survey, analyze, and make sense of the entire field of Web 2.0 crowd-power companies. This book shows how to succeed as a crowdpreneur in the new virtual marketplace by explaining the principles of innovation, revenue models, and the process of going from idea to opportunity. Discover the power of mass collaboration and online networking!
