

What To Do With Who You Are

Books on planning usually focus on reaching goals, but goals are only a small part. By themselves goals are facts without a story, like a punchline looking for a joke. They give you something to work for, but without the rest of the plan they don't guide or inspire. A Personal Strategic Plan is much bigger. It's based on who you are, your dreams and aspirations, your strengths and weaknesses, your joys and sorrows, your heritage and the legacy you want to leave. All of these things are the data that drive the process. *What To Do With Who You Are* helps you find the answers to those hard questions, and then use the answers to create a plan specifically suited to you. The plan includes goals and the steps to achieve them, but also risks, priorities, and contingency plans. All of these are grounded in and supporting a broader plan of where you want to go and what you want to be. *What To Do With Who You Are* provides background information, explanations, stories, suggestions, and exercises that guide you through the entire process of creating a plan as unique as you.
