

# The Kolob Theorem, New Edition with Added Chapter: A Mormons View of Gods Starry Universe

NEW EDITION WITH ADDED CHAPTER. All text and pictures are in black and white. Web sites are included to see pictures in color. Do you believe Gods Throne is in the Center of our Universe? Have you ever Wondered How Gods Universe is Structured? Here is a theory that will give you a deeper understanding of these subjects. The Kolob Theorem written by Professor Lynn M. Hilton allows us to see more clearly the celestial home we lived in before we were born and the home we will live in after we die. These places appear more real; they are made of matter, some of very fine and pure matter, and exist in time and space. It helps us anticipate the reality of the glories of our future home. Lynn, as a man of faith, united in a single theory, scientific evidence, together with LDS sources to account for the form and structure of all of Gods worlds, planets and suns. Lynn advocates the theory that the great star Kolob (which is near unto Gods throne) is located in the center of our Milky Way Galaxy. He examines several basic ideas which grow out of this hypothesis.
