

Medical Kidnapping: A Threat to Every Family in America Today

If you live in the United States of America today, and you have children in your home under the age of 18, every day you are in danger of losing your children to the State through medical kidnapping. Something as simple as bringing your child to the local emergency room to care for an injury or sickness puts you at risk for being accused of medically abusing or neglecting your child, and having a doctor direct a social worker to remove the child or children from your custody by force. Medical kidnapping is defined as the state taking away children from their parents and putting them into state custody and the foster care system, simply because the parents did not agree with a doctor regarding their prescribed medical treatment for the family. In some cases it is as simple as telling a doctor you are going to seek a second opinion on a suggested medical procedure, and then ending up being charged with medical abuse and losing your children. In this book we will introduce you to dozens of families who have had their children medically kidnapped, and we will explain why this is happening to thousands of families all across America today. Every family living in the United States today is in danger, facing medical tyranny and the state-sponsored kidnapping of their children.
