

The Economics of Mining (Classic Reprint)

Excerpt from The Economics of MiningThe pages of this book furnish a reprint of a number of articles, bearing upon the cost of mining, which have appeared in The Engineering and Mining Journal between January, 1003, and June, 1905, a period of two and a half years. As affecting the economic aspect of a world-wide problem, I have included a number of articles dealing with those ethical and financial considerations which are no less important to the industry than the scientific principles underlying the actual breaking and milling of ore at the mine. For the editorial comment I am responsible; some of it, in the light of ampler evidence or maturer thought, I would like to change; but any alteration would involve a recasting of the material detrimental to its value as a record of professional discussion during the period mentioned.About the PublisherForgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.comThis book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
