Building a Survival Kit will help you to survive adverse outdoor conditions: heat, cold or extreme weather. Staying warm and dry is essential and you'll learn how to protect your Core Temperature (CTC) while saving (heat) calories through less energy output. Tips will include essential supplies to bring should an emergency occur. This guide is waterproof and nearly indestructible. It can fit in a back pocket so you can have vital information when you need it. A must-have for the serious wilderness explorer. Co-authored by noted survival expert and woodsman Dave Canterbury, this is one of a 10-part series on survival skills.
